-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --  
Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

## DETAILED ACTION

### *Claim Rejections - 35 USC § 102*

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

2. Claims 1-22 are rejected under 35 U.S.C. 102(e) as being anticipated by Hainberger (U.S. Patent Application Publication No. 2004/0004756).

Regarding claims 1, 5, 8, 11, 14-22, Hainberger teaches a method for transmitting an optical signal comprising: receiving a transmitted optical signal as a received signal, the received signal being transmitted over a first optical fiber path and having at a transmitting end of the optical fiber a first power  $P_1$  and having at a receiving end of the optical fiber a second power  $P_2$ , wherein  $P_1 > P_2$ ; separating the received signal to produce a plurality of bands (reference letters L, C, and S in Figure 2C); and adjusting signal levels in each band to produce a plurality of adjusted bands, wherein a total power of the adjusted bands is substantially equal to  $P_1$  (Figure 2D).

Regarding claim 2, Hainberger teaches amplifying each band by a predetermined gain (inherent).

Regarding claims 3, 6, 9, 12, Hainberger teaches combining the adjusted bands to produce a transmission signal, and transmitting the transmission signal along a second optical fiber path (Figure 2C).

Art Unit: 2633

Regarding claims 4, 7, 10, 13, 16, Hainberger teaches separating each of the bands to produce a plurality of second bands (as seen in Figure 8).

***Conclusion***

3. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. Ooi and Shimojoh disclose relevant art.
